2013 Weeks Vineyard Chardonnay

Winemaking Philosophy

We are committed to low input winemaking utilizing uninoculated primary fermentation and malolactic fermentation. This process is much slower and more time consuming but produces wine lush on the palate with seamless flavors. Low input winemaking also includes gravity flow movements of wine, minimal acid adjustments, minimal SO2 additions, racking only once in barrel, no fining and no filtering when possible.

Vineyards

Weeks Vineyard is on Occidental Road near Jonive total of nine acres planted to chardonnay on Goldridge soil. Planting began in the 1980's to wente clone. This vineyard is located 2 miles east of the town of Occidental. Because of the low yields and high acidity this vineyard works well with our winemaking style. It is south facing on an 8% slope at 672 foot elevation.

Winemaking

Grapes came in September 17th at 22.9 Brix. The grapes were pressed whole cluster to tank for overnight settling then put to barrel with about 50% of the solids. We had nine French oak barrels, three new. The fermentation lasted 7 weeks, very slow and steady, then went through malolactic fermentation for another 11 weeks. Nothing was added to the wine except sulphites. The wine was bottled September 1, 2014 unfiltered and unfined.

Winemakers Notes

Light gold color, this unfiltered wine shows tart apple, baking spices, pear and vanilla in the nose. This Medium body wine show great balance with crisp acid on the finish. Flavors of pear, honey, starfruit, green apple, and a kiss of butter lead to a long creamy finish. With such high natural acidity this wine should age gracefully for the next ten years.
